

SOLAR PUMP CONTROLLER

Features of Solar AC Pump Controller

Dual mode of operation AC/DC.

It can easily match with all kinds of AC/DC submersible pumps.

Suitable for different environment with low maintenance cost.

Max. Operation temperature is 55⁰ C.

It uses minimum system component with maximum output compare to conventional controller.

Transformer less design so Light weight and easily transportable.

Higher efficiency with long life.

Auto/Manual Option Available.

Advantages:

Irrigation possible at Remote locations.

Environment friendly operations.

Highly reliable and durable.

Eco-friendly (Zero Noise Pollution -Zero CO2 Emission).

No fuel required.

Almost no maintenance required.

Provide consistent water.
